

NEWS RELEASE

Teijin to Exhibit at ANEX 2018

Tokyo, Japan, May 31, 2018 --- [The Teijin Group](#) announced today that it would participate in the [Asia Nonwovens Exhibition and Conference \(ANEX\)](#), one of the largest exhibitions for the nonwoven industry professionals, which will take place at the Tokyo Big Sight (Tokyo International Exhibition Center) from June 6 to 8.

The Teijin booth (342) will introduce wide range of materials and products for the environment, automotive, disaster-prevention and healthcare fields.

Exhibits will include:

Sound Absorbers for EV Cars

Teijin's nonwoven ultrafine-fiber fabric absorbs noise ranging from low to high frequencies. It is an excellent sound-absorbing material for engine covers due to its excellent heat resistance, moldability and lamination properties.

Elk High-function Cushion Material

This lightweight cushion material offers diverse functionality, including high elasticity, durability and breathability, as well as safety because it generates minimal cyan gas even if burned. The booth will exhibit a new *elk* material that combines polyester staple fiber and high-cushioning *Solotex* staple fiber, and various products made with *elk*, including cushions and mattresses.

Filtration Materials for Wastewater Treatment

Teijin Frontier will display a chip-shaped fiber-filtration material that removes solid floating matter in industrial wastewater and living drainage. This high-efficiency filter material can withstand high temperatures and eliminates fiber migration better than conventional materials due to special processing. A selection of other functional fiber-filtration materials also will be exhibited.

Various High-function Materials

The booth will additionally present a variety of ultrafine fibers, including *Nanofront*, which offers exceptional filtration efficiency. There also will be displays of fibers for newly developed air through nonwoven fabric, a special short-cut fiber for papermaking, and aramid materials for bag filters and heat-resistant filters.

ANEX is forecasting some 30,000 visitors and over 700 exhibiting companies this year. Teijin's participation is expected to help further raise its profile and continue expanding its market through new proposals towards next 10 years.

About the Teijin Group

Teijin (TSE: 3401) is a technology-driven global group offering advanced solutions in the areas of environmental value; safety, security and disaster mitigation; and demographic change and increased health consciousness. Its main fields of operation are high-performance fibers such as aramid, carbon fibers & composites, healthcare, films, resin & plastic processing, polyester fibers, products converting and IT. The group has some 170 companies and around 19,000 employees spread out over 20 countries worldwide. It posted consolidated sales of JPY835 billion (USD 7.6 billion) and total assets of JPY 986.2 billion (USD 9 billion) in the fiscal year ending March 31, 2018.
