

NEWS RELEASE

Teijin to Participate in ISPO Munich

Tokyo, Japan, January 24, 2019 --- [Teijin Frontier Co., Ltd.](#), the [Teijin Group's](#) fibers and products converting company, announced today that it will participate in [ISPO Munich](#), the world's biggest sportswear exhibition, which will take place at [Messe München](#) from February 3 to 6.

The booth (Hall: C4, Booth: No.306) will showcase high-function materials that offer excellent combinations of comfort and performance for sportswear. The stand also will present recycled, bio-derived materials and microplastics pollution prevention developed under Teijin Frontier's *THINK ECO* initiative for environmentally friendly solutions.

Teijin Frontier's exhibit will include:

- **DELTAPEAK**

Next-generation fabric achieves a high-level integration of physical properties, functionality and quality. Along with softness, durability and elasticity, it also offers ultraviolet protection and anti-transparency, as well as snag resistance due to its dense, flat-knit surface. A newly developed *DELTAPEAK* that is both form-fitting and natural-like appearance will also be exhibited.

- **NANOFRONT**

Teijin Frontier's high-strength polyester nanofiber has a diameter of just 700 nanometers, yet its surface area is several ten times larger than that of conventional fiber, resulting in positive-grip, low-slippage surfaces. It also is cooling, wiping and non-transparent, making it a highly useful material for various fields, including sportswear and innerwear.

- **elk**

This cushiony, durable and breathable material is an excellent substitute for polyurethane in a range of cushioning applications, including bra cups and supporters for sports.

- **CORDLEY**

High-grade artificial leather *CORDLEY* is lightweight, durable and easy to handle, making it great for environmentally friendly sports applications such as balls and shoes.

- **Microplastics Pollution Prevention**

Non-brushing and heat-insulating products that reduce microplastics will be exhibited, including, from the *DELTAPEAK* series, a sweat-suit fabric with a new type of texture that combines bulkiness and a soft feel, and a next-generation sweat-suit fabric combining a water-repellent outer surface and a water-absorbent inner surface.

About the Teijin Group

Teijin (TSE: 3401) is a technology-driven global group offering advanced solutions in the areas of environmental value; safety, security and disaster mitigation; and demographic change and increased health consciousness. Its main fields of operation are high-performance fibers such as aramid, carbon fibers & composites, healthcare, films, resin & plastic processing, polyester fibers, products converting and IT. The group has some 170 companies and around 19,000 employees spread out over 20 countries worldwide. It posted consolidated sales of JPY835 billion (USD 7.6 billion) and total assets of JPY 986.2 billion (USD 9 billion) in the fiscal year ending March 31, 2018.
