

## NEWS RELEASE

### Teijin Frontier to Participate in Outdoor Retailer Summer Market 2015

Tokyo, Japan, July 31, 2015 --- Teijin Frontier Co., Ltd., the Teijin Group's fiber-product converting company, announced today that it will participate in Outdoor Retailer Summer Market 2015, a leading international sports trade fair to be held at the Salt Palace Convention Center in Salt Lake City, U.S.A. from August 5 to 8.

Teijin Frontier's booth (stand: MR150C) will feature a number of leading-edge hybrid products, including DELTAPEAK®, an advanced fabric that enhances the comfortable texture and fashionable appearance of high-performance sportswear.

The exhibit will also feature Teijin Frontier's pursuit of a more comfortable and prosperous future through environmentally friendly solutions that conserve fossil resources and reduce CO2 emissions.

The exhibit will include:

- DELTAPEAK®, a next-generation polyester fabric that integrates physicality, functionality and quality to a high degree. In addition to softness, durability and elasticity, it offers ultraviolet protection and anti-transparency, as well as snag resistance due to its dense, flat-knit surface. The booth will present a wide variety of DELTAPEAK® fabrics featuring nylons, multi-colors, natural-fiber blends and more.
- DELTAPEAK® TL, an all-new, highly comfortable and functional material that achieves the pile structure of toweling. Made of 100% polyester, it offers excellent water absorbency, a soft texture and a unique bulky-but-lightweight feeling.
- High-tenacity polyester fabric, which boasts 1.5 times more tensile strength than conventional polyester to provide athletes with greater comfort and body support for superior performance.
- Solotex® polytrimethylene terephthalate fiber, which is highly soft, stretchable, shape-retaining and durable. Partially bio-derived, it also helps to conserve fossil resources.

#### About the Teijin Group

Teijin (TSE: 3401) is a technology-driven global group offering advanced solutions in the areas of sustainable transportation, information and electronics, safety and protection, environment and energy, and healthcare.
