

NEWS RELEASE

Teijin Frontier to Exhibit at Performance Days Functional Fabric Fair

Tokyo, Japan, November 21, 2018 --- [Teijin Frontier Co., Ltd.](#), the [Teijin Group's](#) fiber and products converting company, announced today that it will showcase a range of high-performance fabrics at [Performance Days](#), a show that introduces functional fabrics for sportswear, athleisure, corporatewear and workwear. The show will take place at Messe Munchen in Munich, Germany on November 28 and 29. This will mark Teijin Frontier's ninth appearance at the event.

The Teijin Frontier stand (No. 110) will showcase hybrid materials with a focus on *DELTAPEAK* series that offer excellent combinations of performance, appearance and texture for sportswear.

Specific exhibits will include the following:

DELTAPEAK

Teijin Frontier's next-generation fabric offers a well-balanced combination of softness, durability, elasticity, ultraviolet protection and anti-transparency. Wind-blocking properties can be added utilizing its dense, flat-knit surface.

4-dimensional bulky *DELTAPEAK*

This new sweat-suit fabric is the new addition to the *DELTAPEAK* series. It offers a soft texture, high-bulkiness and lightweight due to its unique four-layer structure. The booth will showcase a new *DELTAPEAK* line—a two-in-one sweat-suit fabric that combines water-repelling and sweat-absorbing properties.

OCTA

This fiber features a unique, highly modified cross section of eight projecting fins aligned in a radial pattern around a hollow fiber. Notable advantages include rapid wicking and drying as well as useful bulkiness. Another type of *OCTA* is a comfort material integrated with insulation and lining.

Fluorocarbon-free water-repellent materials

Fluorocarbon, a halocarbon in which certain hydrogen atoms are replaced with fluorine, is a greenhouse gas targeted under the Kyoto Protocol. Fluorine buildup is thought to be harmful to the human body and the environment. Teijin Frontier develops durable and water-repellent fluorocarbon-free materials as part of its commitment to environmental protection.

SOLOTEX

Teijin Frontier's polytrimethylene terephthalate fiber is highly soft, stretchable, shape retaining and durable. As a partially bio-derived material, it also helps to conserve fossil resources.

About the Teijin Group

Teijin (TSE: 3401) is a technology-driven global group offering advanced solutions in the

areas of environmental value; safety, security and disaster mitigation; and demographic change and increased health consciousness. Its main fields of operation are high-performance fibers such as aramid, carbon fibers & composites, healthcare, films, resin & plastic processing, polyester fibers, products converting and IT. The group has some 170 companies and around 19,000 employees spread out over 20 countries worldwide. It posted consolidated sales of JPY835 billion (USD 7.6 billion) and total assets of JPY 986.2 billion (USD 9 billion) in the fiscal year ending March 31, 2018.
